

4 Courses

Exploratory Data Analysis  
for Machine Learning

Supervised Machine  
Learning: Regression

Supervised Machine  
Learning: Classification

Unsupervised Machine  
Learning

Sep 16, 2025

**Nam Hai Nguyen**

has successfully completed the online, non-credit Specialization

# IBM Introduction to Machine Learning

This specialization will help you realize the potential of machine learning in a business setting. There will be a focus on helping you gain the skills that will help you succeed in a career in machine learning and data science. You will be able to realize the potential of machine learning and artificial intelligence in different business scenarios. You will also be able to identify when to use machine learning to explain certain behaviors and when to use it to predict future outcomes. You will also learn how to evaluate your machine learning models and to incorporate best practices.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
